

# Tenon Puzzle (魯班梅花鎖) Assembly Guide

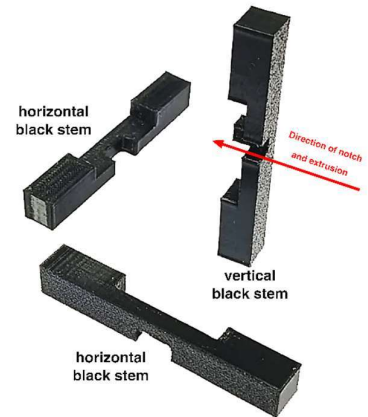

Designed by Murphyte at <https://makerworld.com>

Firstly, recognize different parts.

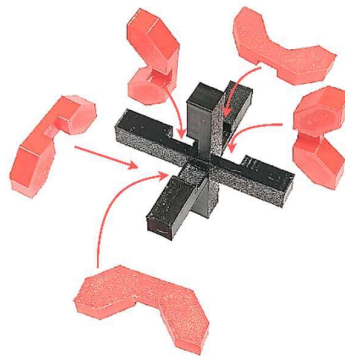

Note that the "Key" has a light mark of THEi logo on it for easy recognition.

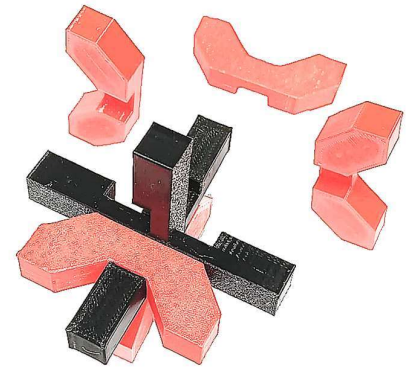

Determining the direction helps you from disorientation during the assembly.

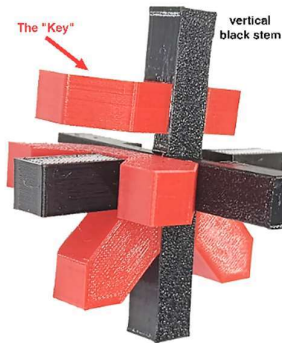

Assemble the 3 stems.

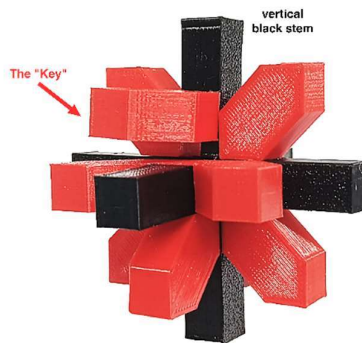

The petals will be assembled in the position shown in this picture.

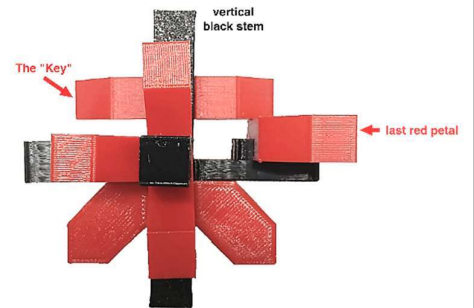

Start with the two red petals as shown.

Then insert the red "key" to the upper part of the vertical stem.

Go on with the next 2 red petals as shown.

For the last red petal, slide/insert it from side under the red "key" petal.

Turn the "key" 90 degree to lock up.

The finished look.

Congrats!

You have got the wisdom from the ancient Chinese civil engineering designers!
